Jesse Vang

Raleigh, NC | jesse@jvang.dev | (847) 848-5048 | www.jvang.dev | github.com/jsvang

SUMMARY

Experienced data and integrations professional with expertise in AI, SQL, Python, R, ETL, APIs, Automation, Cloud Technologies, and Data Visualization. Skilled in consulting, measurement, reporting, cloud products and agile methodologies. Demonstrated success in driving product adoption and revenue growth. Proven ability to optimize data repositories and implement efficient data transfer flows. Strong experience in analyzing customer data and presenting insights to stakeholders. Well-versed in cloud architecture and managing databases. Deep knowledge in user experience design and analytics. Robust background in enablement and documentation. Excellent problem-solving, communication, and project management skills.

SKILLS

SQL, Python, R, TypeScript, Excel, Javascript, Agile, Data Visualization, Analytics, Consulting, Measurement, Reporting, Sigma Six, Devops, Snowflake, Databrocks, AWS, Azure, Google Cloud, Learning & Development, Project Management, Azure AI Foundry, Google AI Studio, Vertex, Workato, Workato Go, Workato Genies, LMStudio, Hugging Face

WORK EXPERIENCE

Red Hat **Raleigh, NC**

Senior Data Architect - Product Security **December 2025 - Present**

- Lead Data Strategy of Product Security Data
- Refactor legacy scripts and consolidate data pipelines into a hybrid cloud model across multiple barebones and SaaS solutions
- Consult with Stakeholders on product requirements which include interactive dashboards and RAG chatbots
- Incorporate AI reasoning into Agentic SDLC workflow to scale vulnerability detection (growing 25% m/m)

Collibra **Raleigh, NC**

Software Engineer **August 2024 - December 2025**

- Lead implementation, support, and roadmap of Workato Genie & GO platform for all internal associates
- Sat on AI Commitee and lead enablement sessions on AI and Automation
- Evaluated AI tools and Application architecture on procurement committee to prevent opex leakage
- Automated order to cash process saving 2 days of manual processes and increased accuracy
- Developed various AI agents and slackbots for workplace productivity prioritizing governance, efficiency and accuracy that utilized RAG and multi-agent orchestration
- Developed AI Support Agent that automated tier 0 and tier 1 support that triaged tickets to respective product groups based upon customer history, account notes, and telemetry data from various CRM, monitoring, and internal knowledge bases
- Developed a customer health agent using AI that messaged account teams that flagged risk of churn based on various data points that includes a technical instances, CRM, and behavorial perspectives.
- Implemented FedRAMP infrastructure for our Public Sector Business Unit

Bioventus **Durham, NC**

Data Engineer - Strategic Pricing **September 2023 - August 2024**

- Pioneering a digital transformation and creation of a data warehouse
- Gather requirements from National Directors of Sales and Create sales targeting dashboards using PowerBI
- Maintain and define and develop star data schema stored in MS SQLServer (SSIS)
- Integrate and join public government data with internal sales, rebates, chargeback, and contract data
- Utilize Dell Boomi ETL for data pipeline with 20+ data sources
- Manage resources, budget, and technology to multiple cross functional stakeholders and teams

Red Hat **Raleigh, NC**

Global Adoption Data Analyst - Customer Success **Mar 2022 - June 2023**

- Explained product portfolio value & capabilities to customers, guiding adoption of Red Hat solutions which retained customer renewals by 86%
- Provided tailored customer-focused plans to meet the objectives of customers, resulting in a 3.5x average increase in revenue.
- Created a program to scale the customer lifecycle journey data and reduce reporting lag time by 50%
- Queried and Presented Telemetry data via SQL and created data stores with salesforce data to analyze customer health
- Presented analysis and recommendations to stakeholders and account teams through reports pulled from SQL databases and visualized through Tableau
- Covered and Monitored Product Adoption OKRs and KPIs at a Global Enterprise level including NA, Public Sector, LATAM, EMEA, and APAC Regions
- Consulted on data migrations and application onboarding for Telco, Commercial, and Enterprise Segments

Red Hat **Raleigh, NC**

Senior Data Analyst - People Analytics **May 2021 - Mar 2022**

- Optimized data repository by overseeing the integration of external databases via agile methodologies and automating data transfer flows utilizing SQL and python languages, delivering lag time reduction by 30% and data accuracy.
- Served as Product Owner and developed a roadmap and feedback loop for data acquisition from data sources including flat files, relational databases, noSQL databases, and APIs
- Collaborated with Cross-Functional teams and Stakeholders to identify key OKRs and KPIs using visualization tools such as Tableau and Looker resulting in a 4.6/5 stakeholder CSAT

Red Hat **Raleigh, NC**

Data Architect - Red Hat University **Feb 2016 - May 2021**

- Designed and scheduled ETL load, copy, staging, and data marts using SQL, python, & JSON pipelines to optimize data load time and enable data governance across the enterprise
- Optimized cloud technology stack for applications supporting 20,000 global users, keeping uptime by 99%

• Maintained and defined data dictionary and technical documentation to promote data literacy across the organization using Miro, Pentaho, Drupal and Git

• Managed Backlog, Intake, Priorities and CI/CD Feedback Loop in Agile Sprints using kan-ban style tools such as Jira and intake ticketing systems such as Service-Now

• Utilized and managed Postgres, MySQL, MongoDB, and Amazon Redshift databases to store data

• Supported internal RHLS users and it's integration with Red Hat University's LMS system

• Supported the KOALA exam program and was Raleigh's point of contact for kiosk support

• Other previous roles in this organization include reporting analyst, learning and development analyst and learning technologist

• Supported Sales and Engineering Enablement Dashboards and Reporting

NOTABLE PROJECTS

DocuSign Hackathon

Winner

• Secured placement in Docusign Sponsored Global Hackathon, enhancing recognition of innovative technology solutions to aid in digital transformation at a global scale

• Our team created an app that helped the Jane Goodall Institute track chimpanzee movement using a combination of GPS and DocuSign APIs for its workflow

• Details can be seen at "https://devpost.com/software/top-secret-to-be-filled-out-later"

Red Hat blog

Contributor

• Reflected on the evolution of my career into a data architect

• Authored an article about tools everyone has access to that can solve data problems at scale

• Details can be seen at "https://www.redhat.com/architect/users/jesse-vang"

WOW 2025

Panelist

• Discussed Adoption Strategy to Evangelize Workato's Platform across the Enterprise

• Shared lessons learned from our journey to the community

• Details can be seen at "https://www.workato.com/the-connector/amplitude-collibra-ai-automation/"

EDUCATION

North Carolina State University **Raleigh, NC**

Bachelors in Finance & HR
